Summary

I am a programmer all of my life, since my 19, learning by myself primarily.

Now I am focused on Blockchain technology using Web3/Solidity as well as web/mobile programming using Node.js/React.js/Ruby on Rails.

Many projects I have done as a full-stack developer because when it's small or medium, I can provide fast pace and clean result.

I like a positive or neutral emotional state in working, I like clearly defined goals. When it's not well decided, I often can provide my expertness in web-development to help a customer choose a set of features, or make more effective infrastructure.

Experience

Freelance Software Engineer
Upwork

Mar 2010 - Present (12 years 4 months +)
